Detailed Actions

1. Amendment received on 8/16/2006 is entered.
Replacement sheets of Drawings (Figs. 2, 3, and 6) are entered.
Claims 1-3, 5-8, 10, 12-14, 16-20 are amended.
Claims 1-20 are pending in the Application.

Claim Objections

2. Claims 1 and 20 are objected to because of the following informalities: Claims should begin with a capital letter and ends with a period (MPEP 608.01 (m) [R-3] Form of Claims). Appropriate correction is required.

3. Claim 14 is objected to because of the following informalities: the language the claim recites the limitation "said first and second CMOA devices" in line 17. There is insufficient antecedent basis for this limitation in the claim. Apparently Applicants meant to indicate said first and second NMOS devices. Appropriate correction is required.

Specification

4. A substitute specification excluding the claims is required pursuant to 37 CFR 1.125(a) because term CMOS is used throughout the Specification, but the Drawings and the Claims indicate NMOS devices.

Art Unit: 2836

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

Allowable Subject Matter

5. Claims 6-19 are allowable over prior art.
6. Claim 2-5 objected to as being dependent upon an objected base claim, but would be allowable if the base claim is allowed.

The following is an examiner's statement of reasons for
indicating allowable subject matter:

7. Independent Claims 6 and 13 are allowable because none of the prior art of record disclose an IC output stage protection device wherein a first, a second and a third NMOS devices or a first, a second and a third pairs of NMOS devices cascoded between an output node and a current source and an operating voltage of the first NMOS device or the first pair of NMOS devices is lower than an operating voltage of the second and third NMOS devices or pairs in combination with the other claim limitations.

Final Action

THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2836

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
